Professional Summary

I am a third-year Computer Science Engineering student specializing in Software Modelling, DevOps, and Full Stack Development. Skilled in Java, Data Structures and Algorithms, and modern software practices, I am passionate about building scalable, efficient solutions and continuously expanding my technical expertise.

Skills

- Java, C++, JavaScript, HTML, CSS, Python
 - Node.js, React.js
-

Projects

Syntra – Task & Project Management System

- Developed a web-based task and project management system using **Next.js**.
 - Built responsive, interactive dashboards for task tracking and workflow management.
 - Implemented backend APIs and business logic using **Next.js API routes**.
 - Integrated **Neon DB (PostgreSQL)** for scalable and secure data storage.
 - Collaborated using **Git** and **Agile methodology** and demonstrated the project to faculty.
-

Work Experience

Member @ Websico Club

Oct 2024 – Present

- Collaborated on projects that enhanced skills in software development and problem-solving.
 - Contributed to workshops and coding challenges, gaining hands-on experience with diverse programming tools.
 - Fostered strong teamwork abilities in a technical environment.
 - Deepened passion for technology and continuously improved coding proficiency.
-

Education

Student @ KL University

Aug 2023 – May 2027

- Pursuing a Bachelor's degree in Computer Science and Engineering with a specialization in Software Modelling and DevOps.
- Acquired a strong foundation in programming, software engineering principles, and modern development practices.
- Participated in hands-on projects and technical clubs, strengthening practical skills, collaboration, and problem-solving abilities.
